

**WHY COVRGARD®**

## WINDSCREEN PROTECTION FILM?

Your windscreen is at risk, due to the combination of worsening road conditions and environmental factors. To safeguard your investment and extend its lifespan, it is essential to take preventive measures. Doing so not only ensures your safety but also helps you avoid the inconvenience and expense of replacement.

### PRODUCT FEATURES

Impact resistance to protect windscreen from every day road hazards.

Ideal for maintaining luxury cars and fleet vehicles.

Significantly less expensive than replacing a windscreen and better for the environment as most broken screens end up in landfill.

Optically clear.

Protects against 99% of the sun's harmful UV rays.

More hydrophobic than glass giving better clearance of rain and snow.

PROTECT YOUR INVESTMENT

## High-Performance

CovrGard offers a solution with a choice of high-performance windscreen protection films, which are valuable additions to your vehicle. These films are designed to protect vulnerable glass surfaces from damage caused by impact and abrasion.

We offer two advanced types of films: PET (polyethylene terephthalate) and TPU (thermoplastic polyurethane). Both films are made from durable materials and feature a hard coat technology, providing excellent hydrophobic properties that repel water and moisture. They also offer 99% UV protection, safeguarding your vehicle and its occupants from harmful UV rays. By choosing these films, you're not only protecting your vehicle but also actively ensuring the safety and well-being of those inside.

The film comes with a warranty against manufacturing defects such as UV degradation, bubbling, and cracking. It is easy to apply and enhances the longevity of windscreens and other vulnerable glass surfaces in various environments. The film maintains the clarity and appearance of glass surfaces while reducing the risk of costly repairs and replacements.

For ultimate peace of mind choose CovrGard for reliable and long-lasting protection.

### Performance Data

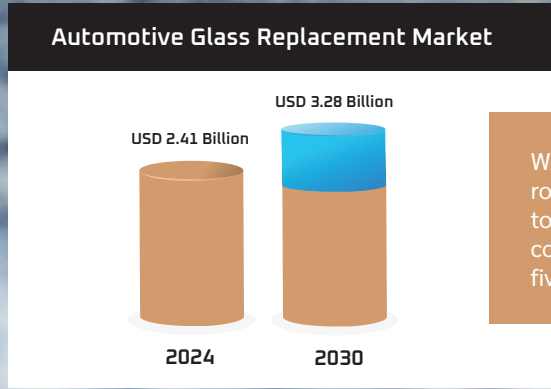

|                                    | COVRGARD PET   | COVRGARD TPU   |
|------------------------------------|----------------|----------------|
| Total Thickness                    | 0.147mm (147μ) | 0.185mm (185μ) |
| Visible Light Transmittance        | 91.1%          | 94%            |
| IR Reduction                       | 5%             | 15%            |
| UV Rejection                       | 99%            | 94%            |
| Peel Strength ASTM D3330 (+/- 100) | 1000gf/inch    | 500gf/inch     |
| Surface Contact Angle              | 105°           | 95°            |

## WINDSCREEN PROTECTION FILM

### EXPERIENCE THE ULTIMATE PROTECTION

Cracks and chips in windscreens can be expensive and hazardous. Safeguard your vehicle with CovrGard Windscreen Protection Film.

National Windscreens based in the United Kingdom alone says “it's increased the number of windscreen replacements that it has undertaken in the last six months by 74% compared to the same period last year.”

Worsening road surface conditions are contributing to additional road debris increasing the chances of damage caused by stone chips to vulnerable glass surfaces. Industry experts are anticipating continued growth in the Glass Replacement Market over the next five years and beyond.
