

WHY COVRGARD®

SOLAR CONTROL WINDOW FILM?

CovrGard Window films offer top of the line sun control and UV Protection.

Selected for their overall performance, our range of ceramic films are designed to block the highest proportion of harmful IR rays. When you choose CovrGard you can count on getting the highest quality and most durable solar control window film.

HIGH HEAT REJECTION

Ceramic based window film is highly effective at blocking infrared radiation (IR), the main cause of heat build up inside a vehicle. Fitting CovrGard window film keeps the interior cool even in extreme temperatures.

UV PROTECTION

In addition to blocking IR radiation, ceramic window film also blocks a significant amount of ultraviolet (UV) radiation. This can help protect your skin and the interior of your car from the harmful effects of the sun's rays.

IMPACT RESISTANCE

Our window films are designed to be impact resistant, meaning they can help to hold the glass together in the event of an accident or break-in attempt.

DURABLE AND LONG-LASTING

Ceramic window film is highly resistant to scratching, peeling, and fading, which makes it a long-lasting choice for protecting the windows of your car.

SLEEK, MODERN LOOK

Ceramic window film provides a sleek, modern look for your car, and is available in a range of shades to suit your personal style and preferences.

PRIVACY

Darker window films can provide privacy by making it difficult for people to see into the car.

EASY TO CLEAN AND MAINTAIN

Ceramic window film is easy to clean and maintain, and can be removed without damaging the car's windows.
